before the meeting.*

## Low Flow Toilet Rebate Program

The Village of Cremona offers a Utility Rebate Program to assist residents with homes built prior to 2008 in achieving a higher level of potable water conservation or replacement of high flow toilets (6 or more litres) with a low flow or dual flush toilet.

It is estimated that as much as 30 percent of water consumed in the home is flushed down the toilet. Based on CMHC Household Guide to Water Efficiency, an average family replacing an older high flow toilet with a 6 litre model can achieve water savings of more than 12,000 litres per year.

Rebates are credited to a Village of Cremona Utility account, which must be in good standing.

Properties eligible to participate in the Program must be on the Village's metered water system.

All rebates are subject to the availability of funds.

Commercial-business properties and Institutional properties (schools, hospitals, seniors' lodges, etc.) are not eligible for participation in this program.

**JUNE  
13, 2019  
4-6**
